

2015 OUTREACH SUMMARY

Overlake Medical Center's Cancer Center is committed to meeting the needs of our community. One way we do so is by providing cancer screenings, prevention tools and educational opportunities.

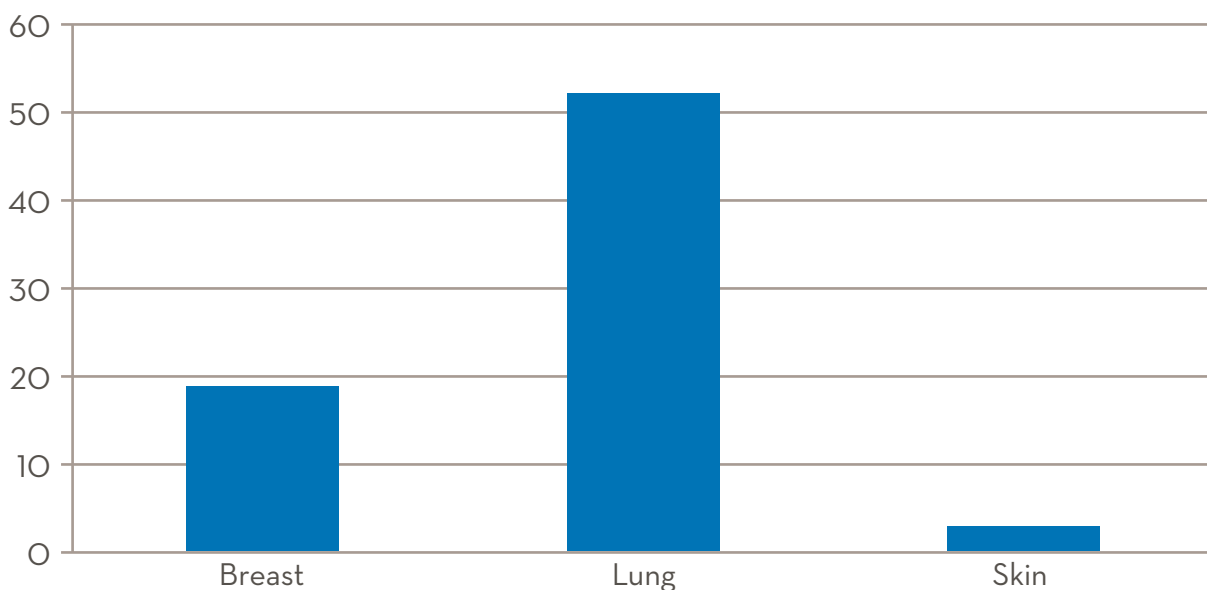

Cancer Screening Events

In 2015, we provided 63 screening events with 316 people being screened. Screening events included five "Mammo Parties" for breast cancer screening, four high-risk breast cancer screening events, 52 low-dose CT scans for lung cancer screening and two skin cancer screening events. From those screenings, 96 people were navigated and referred for additional workup because of abnormal findings, of which 5 were diagnosed with cancer.

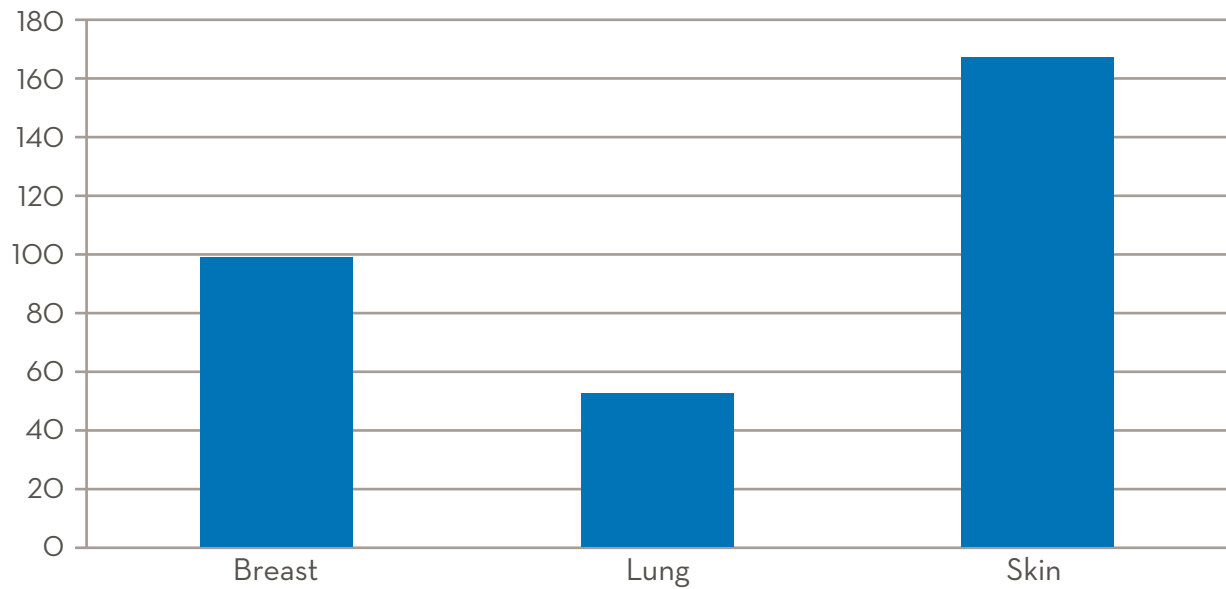

Summary of Cancer Screening Activities

	Events	Participants	Participants Navigated	Diagnosis of Cancer
Breast	9	100	31	0
Lung	52	52	15	0
Skin	2	164	50	5
