

# Overlake Medical Center and Clinics

Overlake's mission is to provide compassionate care for every life we touch. A major regional medical center serving the Eastside since 1960, Overlake provides comprehensive health services, from prevention and wellness outreach efforts to life-saving emergency and acute care.

## An Essential Community Resource

Overlake is an integral part of the emergency services infrastructure of King County, operating the first Level III Trauma Center on the Eastside, and serving as Harborview Medical Center's backup emergency responder. Led by a volunteer board of directors, we serve over 100,000 patients at the medical center, plus more than 280,000 patient visits in our ambulatory clinics each year.

Overlake offers programs to benefit the larger community, including community education classes on a wide range of health-related topics, such as childbirth preparation, first aid and CPR, weight loss and caring for people with dementia. In addition, we provide free health screenings at various community events.

## Programs and Accomplishments

- 349-bed, tertiary hospital
- More than 2,900 employees
- Nearly 500 volunteers
- Nearly 1,000 active and courtesy providers on our medical staff, including more than 150 employed providers
