

CAMPAIGN UPDATE

Spring 2026

Advancing Care *Together*

Now over three years into our five-year *Our Overlake: Advancing Care Together* campaign, we are honored to share the extraordinary impact donors like you are making. Thanks to remarkable community generosity, we have already raised more than 80% of our \$55 million goal. From the outset, the campaign was built around four pillars—expanding key medical services, developing our caregiving team, advancing technology, and ensuring equitable access to care—each one essential to preparing Overlake for the needs of a rapidly growing and changing region. Your support is strengthening every one of these pillars and helping transform how we care for patients across the Eastside and beyond.

Maintaining and Expanding Key Medical Services

Across Overlake, clinical programs are reaching new levels of excellence, thanks in large part to donor partnership. Our heart and vascular program continues to shine as a regional leader. This year, our transcatheter aortic valve replacement (TAVR) program earned a national Top Quality Rating—an achievement held by only 21 programs nationwide. And just last month, our team completed a tricuspid valve repair using newly FDA-approved technology, marking a first for the Eastside and offering new hope to patients with previously limited options.

Philanthropy is also driving breakthroughs in other essential service lines. Our High-Risk Cancer

Your support is transforming how we care for patients across the Eastside and beyond.

Our OVERLAKE

(Continued from page 1)

Surveillance program provides deeply personalized support for individuals facing elevated cancer risk, while new imaging and radiation equipment—funded by donor generosity—is already saving lives in our Cancer Center. In our Childbirth Center, clinical teams again earned recognition from *U.S. News & World Report* as a High Performing Hospital for Maternity Care, the fifth consecutive year this honor has been awarded.

Meanwhile, Overlake's neurosurgery and epilepsy programs are expanding their ability to care for patients with complex neurological conditions. These advanced services allow more individuals to remain close to home while receiving expert treatment, bringing comfort and continuity during

some of the most challenging periods in their lives.

Developing Our Caregiving Team

People are at the heart of Overlake. Our new Patient Care Technician Residency Program reflects our commitment to nurturing the next generation of caregivers. This program offers new healthcare professionals structured training, mentorship, and the confidence that they belong to a team that will support their success.

Utilizing Technological Advances

Investments in technology are reshaping the patient experience. New systems for scheduling, digital workflows, and record-keeping are reducing delays and giving clinicians more time to focus on what matters most: caring for patients with skill and compassion.

Ensuring Equitable Access to Care

Overlake's mission includes caring for every member of our community. Last year, we provided nearly \$27 million in charity care and expanded our free classes and support groups to ensure that wellness resources remain accessible to all.

Looking Ahead

As we move into the final stretch of the campaign, the impact of donor support is unmistakable. You are helping Overlake grow, innovate, and reach patients with care that is more coordinated, equitable, and forward-thinking than ever before. We are profoundly grateful for your partnership and inspired by the shared commitment to exceptional health care on the Eastside and beyond. Your generosity is moving this work forward every day.

Expanding EMERGENCY CARE

Emergency care remains one of Overlake's most essential services—

often the first point where patients feel the comfort, competence, and calm that our teams bring to moments of crisis. Last year alone, our emergency clinicians cared for more than 59,000 patients, offering timely evaluation, expert treatment, and compassionate guidance during some of life's most overwhelming situations. Patients from the Eastside and beyond are choosing Overlake because they know our Emergency Department delivers the kind of care they can trust when every minute matters.

To extend that access, Overlake opened Overlake MultiCare Emergency – Lynnwood, bringing high-quality emergency care into a rapidly growing and diversifying community. The Lynnwood location reflects our commitment to meeting patients where they are—reducing travel time, easing barriers to care, and ensuring that families across a wider region can reach an Overlake emergency physician at any hour. With 24/7 physician coverage, advanced diagnostics, and seamless coordination with our specialty teams, the Lynnwood site offers the same standard of excellence as our hospital-based ED.

This expansion is supported in part by the *Our Overlake: Advancing Care Together* campaign. Donor generosity is strengthening the entire emergency care continuum—helping to staff and equip both emergency departments, advance technology integration, and build a system capable of serving a rapidly expanding service area. **Thanks to your partnership, Overlake is creating an emergency care network that is accessible, resilient, and prepared to meet the needs of a growing region.**

DONOR SPOTLIGHT

Rao (left) and Satya Remala

When the **Satya and Rao Remala Foundation**

committed a \$150,000 challenge match for the 2025 year-end appeal, the goal was to inspire generosity and momentum. That goal was exceeded—quickly. Thanks to the enthusiasm of our donor community, the Remala Foundation's challenge, combined with a second donor's match, was fully met before the year was even over.

Moved by that response, the Remalas did something extraordinary: They contributed an additional \$150,000, doubling their original commitment and further amplifying the impact of the appeal.

"Our intention was to encourage others to give," said Rao Remala. "When we saw how strongly people responded, it felt right to do more."

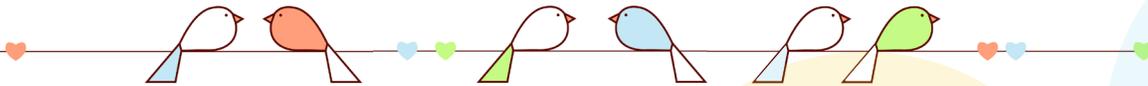

The Remalas have been

valued partners since 2006, with lifetime giving now approaching \$750,000. Their philanthropy recently took a lasting form with the establishment of the Satya and Rao Remala Foundation Endowment, which supports professional education, exploration, and training related to advanced cardiovascular procedures and innovations.

"Advances in cardiovascular care don't happen by accident," Rao shared. "They come from learning, collaboration, and the freedom to explore better ways of treating patients. We wanted to help make that possible—for today and for the future."

Their generosity continues to strengthen not only programs, but the people and ideas that move medicine forward.

THE HEART OF OVERLAKE

Voices of Gratitude From Those You've Helped

Every day, patients across Overlake experience moments of relief, courage, and compassionate care — moments made possible by generous supporters like you. Your commitment helps ensure that every person who walks through our doors is met with skill, kindness, and dignity.

Here are a few reflections from patients whose lives were touched by your support.

“Overlake is the best facility I have ever been to. They prepared me thoroughly and made sure I understood every procedure.”

— Surgery Patient

“I am in a wheelchair, and the technicians were extremely helpful and kind. I am so grateful!”

— Outpatient Imaging Patient

“We had a truly outstanding experience during my delivery and subsequent stay at Overlake. The commitment and care demonstrated by all the nursing staff were exceptional.”

— Childbirth Center Patient

“In times of crisis, it's great to have genuinely caring and capable people to look after you like everyone at Overlake ER. You're all angels.”

— Emergency Department Patient

These words represent only a small glimpse into the profound impact you help create. Thank you for ensuring compassionate care reaches every life we touch.
